LEOPARD 2A6

MAIN BATTLE TANK

Uso de su pack de mejora

En este pack encontrará piezas nuevas que han sido sometidas a pruebas para mejorar el funcionamiento de su carro de combate principal Leopard 2A6. Use estas piezas como reemplazo de las piezas originales suministradas durante la construcción.

Pack 02, fase 10 parte 10-1: Un resorte más blando para mejorar el retroceso del cañón. Desenrosque el resorte instalado en la pieza 10-1 y sustitúyalo por el nuevo resorte con la etiqueta 10-1.

Pack 02, fase 10, parte 10-2: Un resorte más rígido para mejorar el funcionamiento del movimiento de ascenso/descenso del cañón.

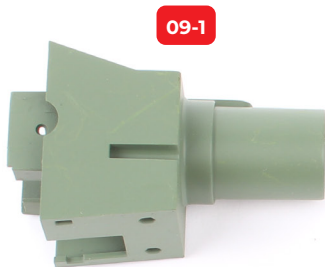

Los packs 6 y 7 incluyen resortes para la suspensión de las ruedas. Estos resortes son ideales si solamente tiene la intención usar su Leopard con propósitos de exhibición. En el pack 12 se entregan resortes más rígidos aptos para el control remoto sobre superficies desiguales. Sin embargo, también los hemos incluido en este pack de modo que pueda seleccionar los resortes que desea usar cuando llegue a esta etapa de la construcción. Si no está seguro, use los resortes de este pack y descarte los resortes de suspensión de las ruedas de los packs 6, 7 y 12.

Pack 9, fase 75, parte 75-1: Una nueva PCB para mejorar el funcionamiento de giro de la torreta y de los faros.

Pack 10, fase 82, parte 82-1: Un cable nuevo para mejorar el giro de la torreta.

Pack 11, fase 91, parte 91-1: Una nueva placa de circuitos para mejorar el sonido y el retroceso del cañón principal.

Esperamos que disfrute construyendo su tanque Leopard. Visite nuestra página sobre el Leopard 2A6 en el foro para obtener asistencia adicional y leer conversaciones interesantes.
