IT: +5 parti di ricambio

LEOPARD 2A6

MAIN BATTLE TANK

Come utilizzare il pacchetto di upgrade

Questo pacchetto contiene parti nuove che sono state testate e collaudate per migliorare le prestazioni del tuo carro armato da combattimento Leopard 2A6. Utilizzale al posto delle parti originali che hai ricevuto durante il processo di costruzione.

Pacchetto 02, fase 10 parte 10-1: una molla più morbida per migliorare il rinculo del cannone. Svita la molla fissata alla parte 10-1 e sostituiscila con la nuova molla etichettata 10-1.

Pacchetto 02, fase 10, parte 10-2: una molla più rigida per migliorare le prestazioni del movimento verticale del cannone.

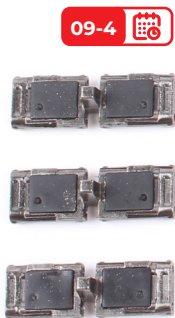

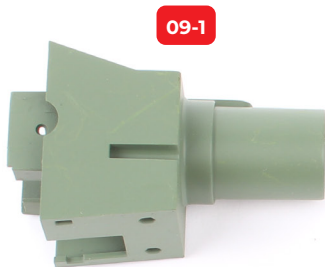

Pacchetti 6 e 7: includono molle per le sospensioni delle ruote. Queste molle sono adatte se intendi utilizzare il carro armato Leopard soltanto a scopo espositivo. Nel pacchetto 12 sono state incluse molle più robuste, adatte all'uso telecomandato su terreni dissestati. Tuttavia, le abbiamo inserite anche in questo pacchetto, in modo che tu possa scegliere quali molle utilizzare quando raggiungi questa fase della costruzione. In caso di dubbi, utilizza le molle per le sospensioni delle ruote contenute in questo pacchetto e scarta quelle fornite nei pacchetti 6, 7 e 12.

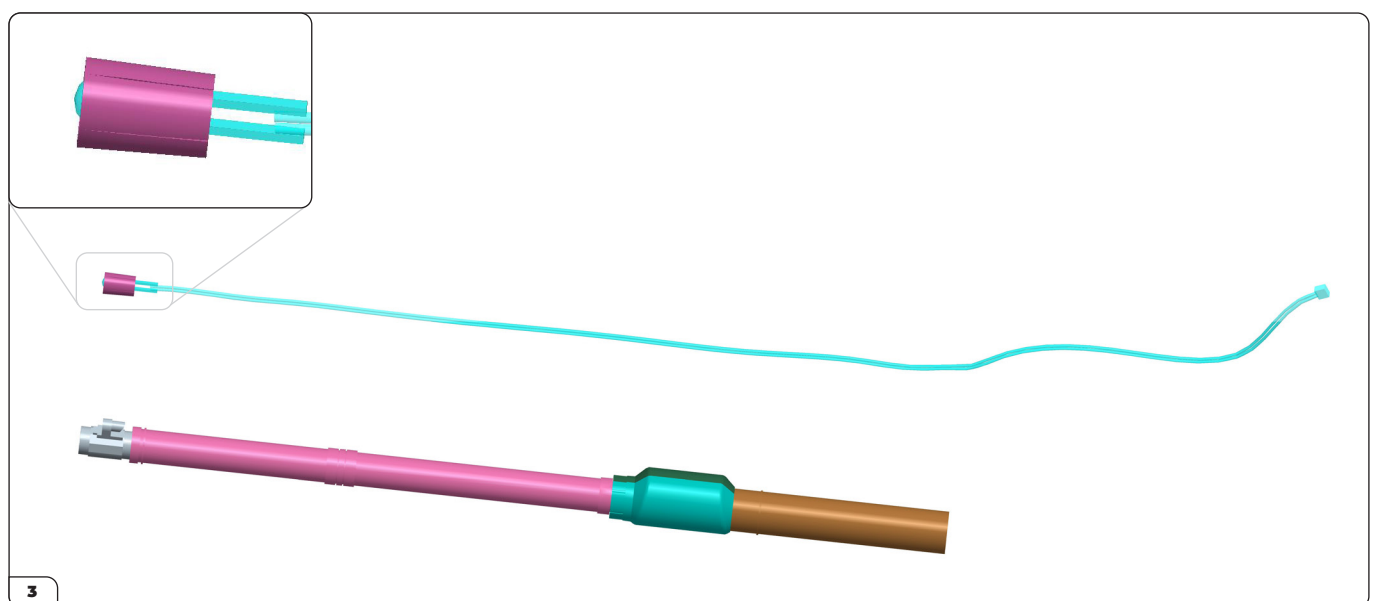

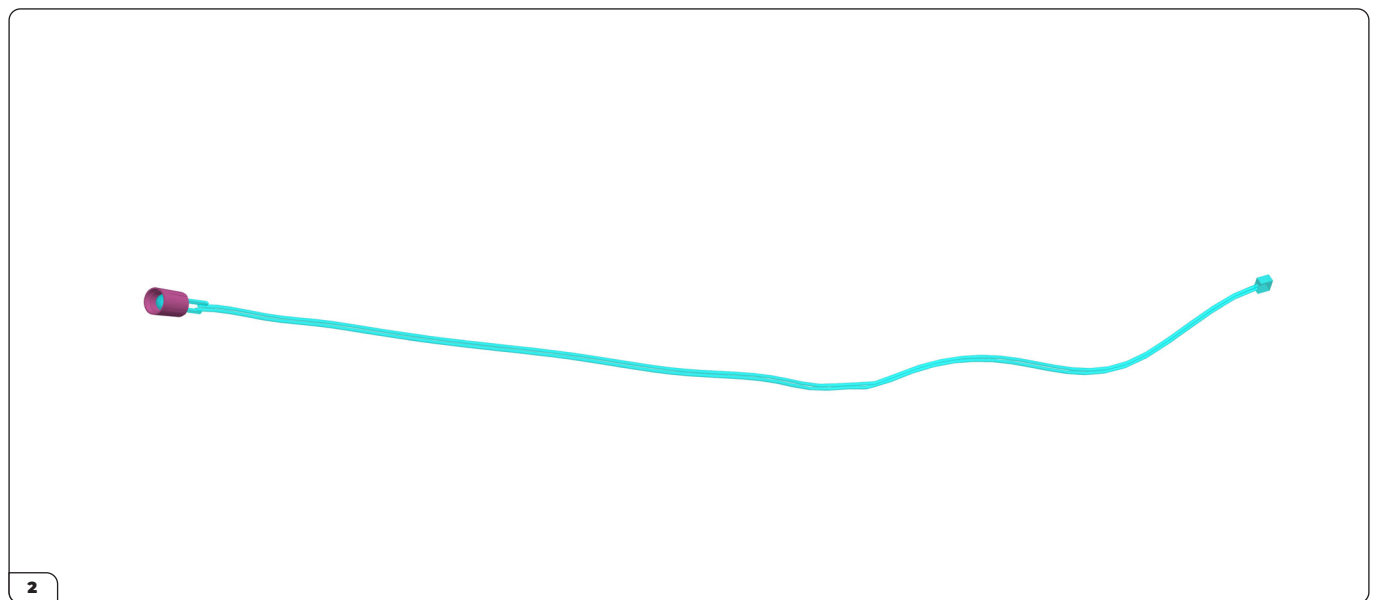

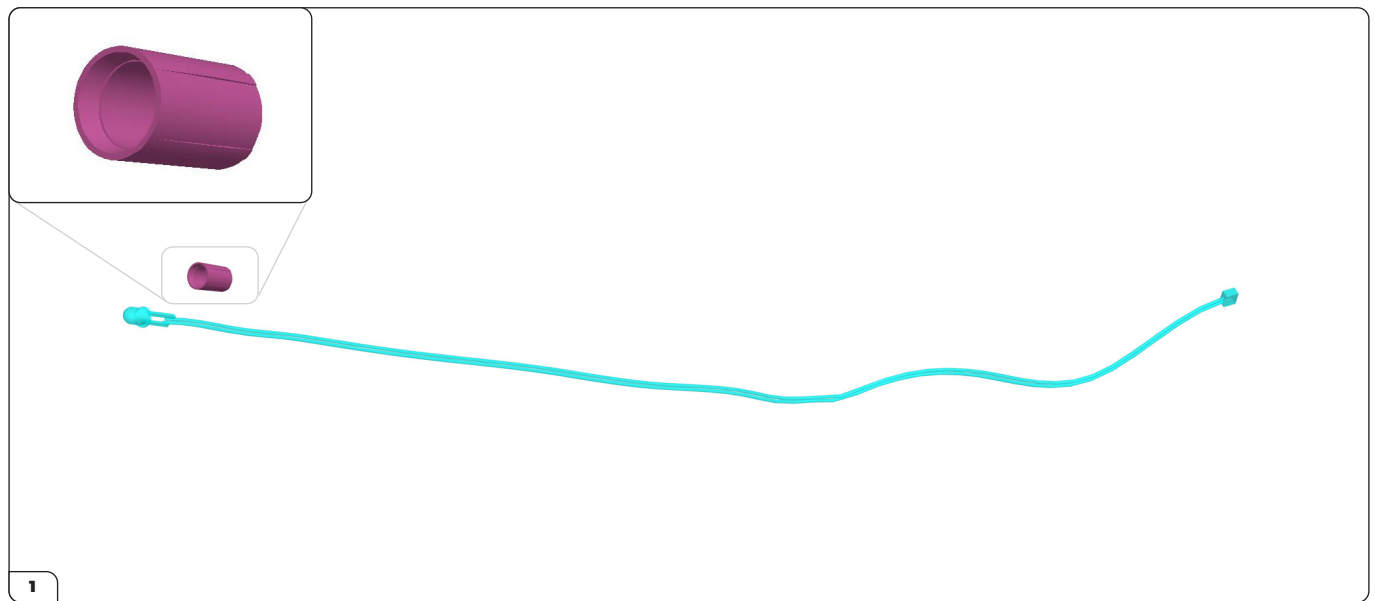

Pacchetto 9, fase 75, parte 75-1: un nuovo circuito stampato per migliorare le prestazioni della rotazione della torretta e il funzionamento dei fari.

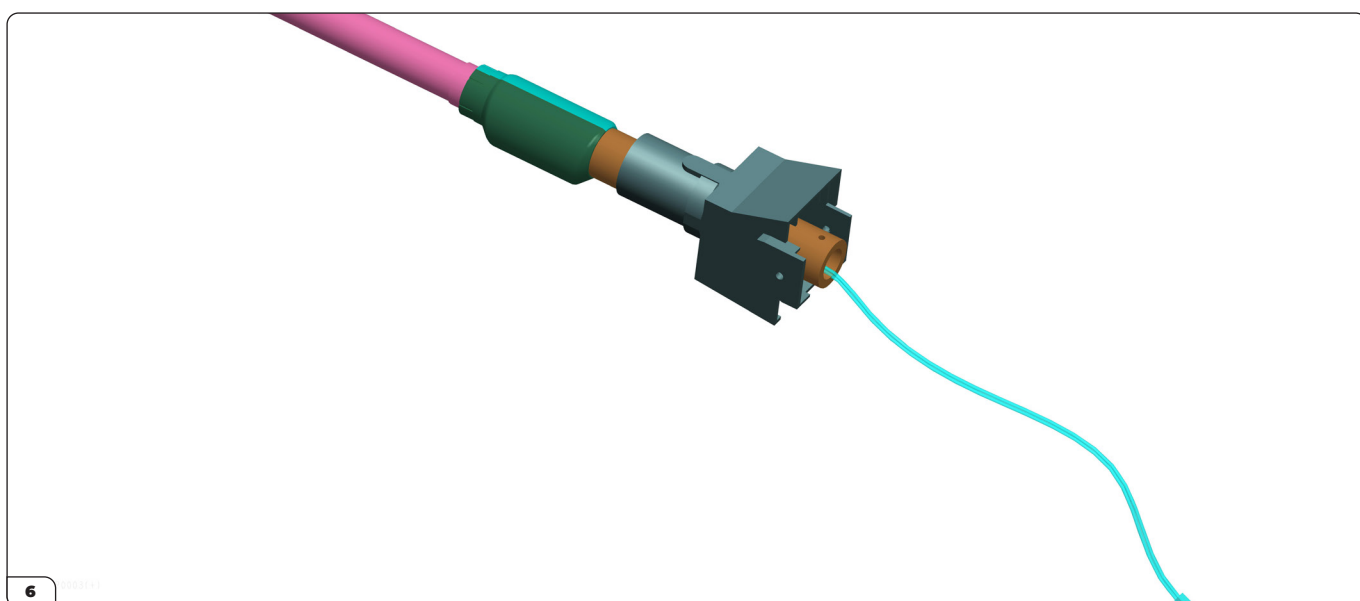

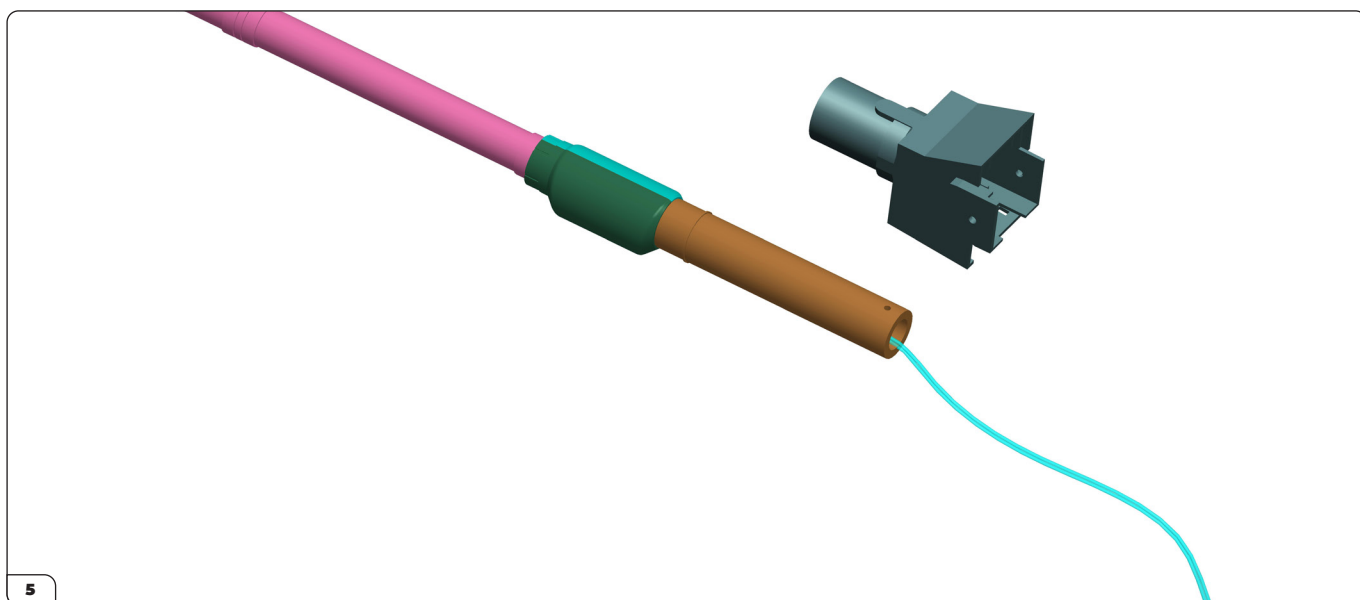

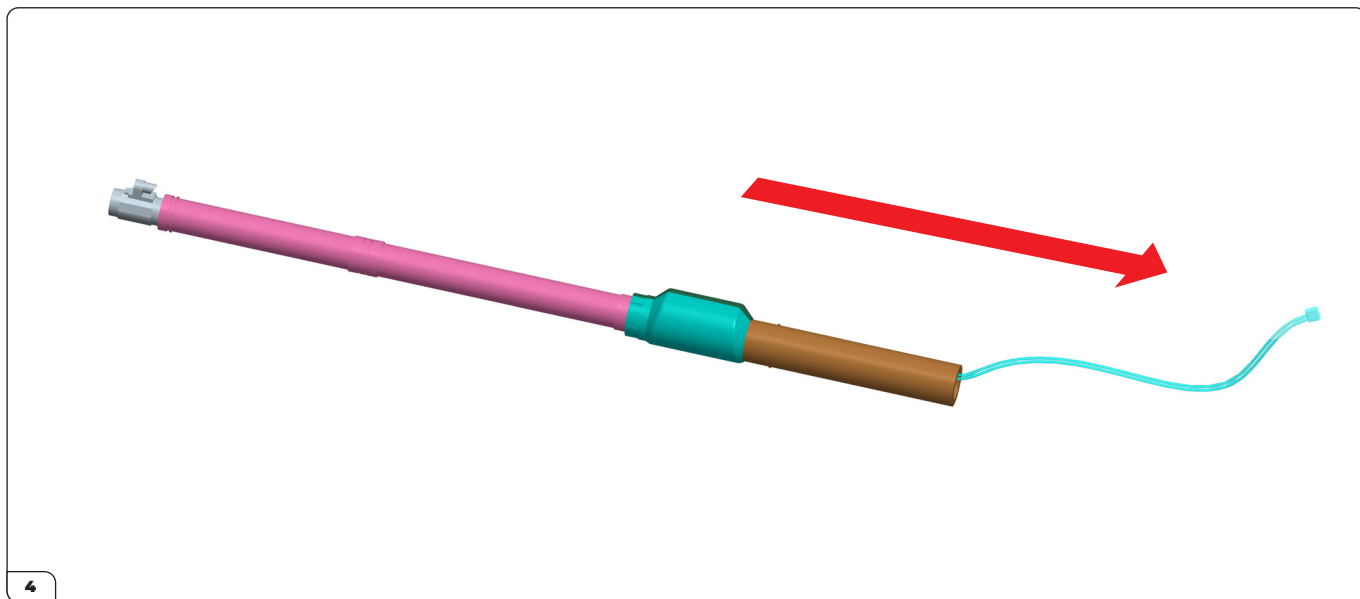

Pacchetto 10, fase 82, parte 82-1: un nuovo cavo per migliorare la rotazione della torretta.

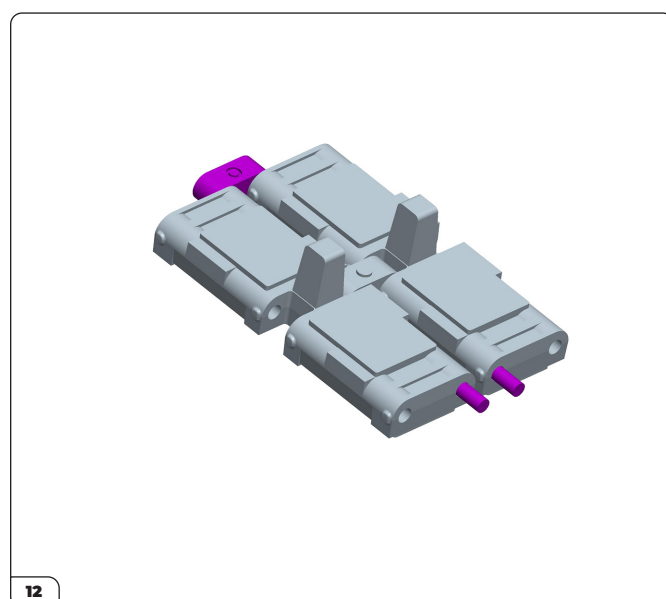

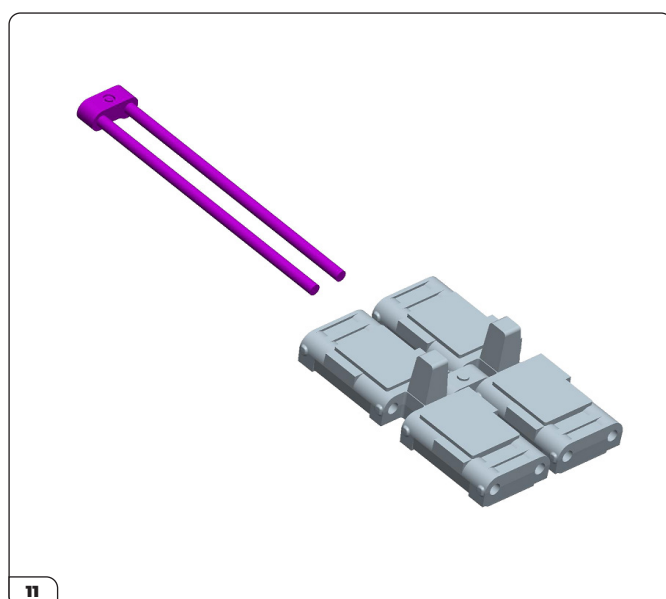

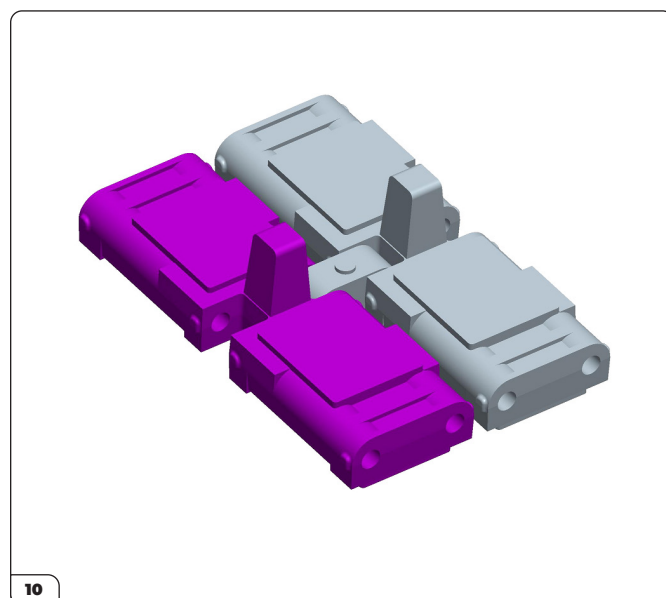

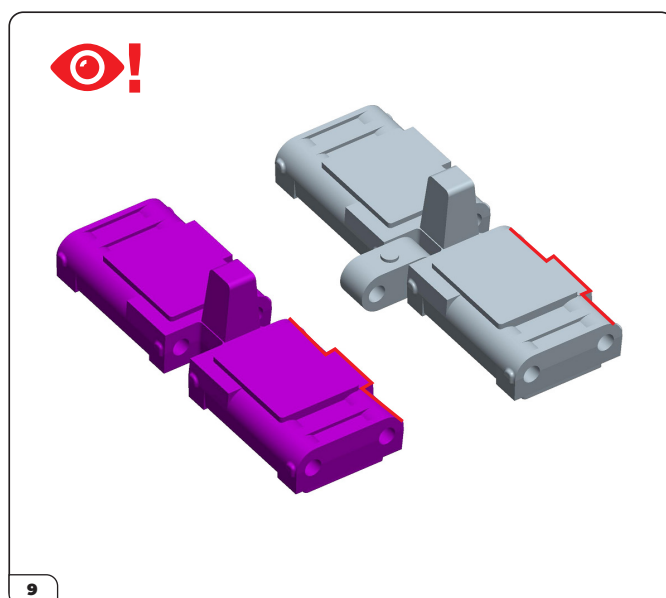

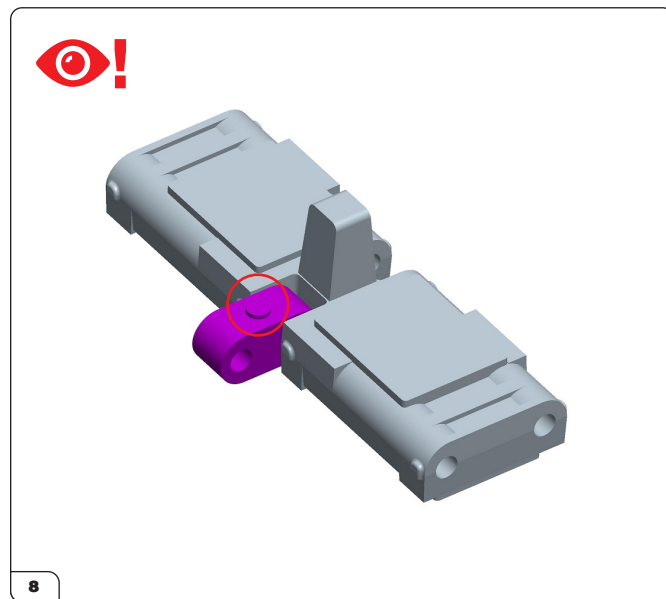

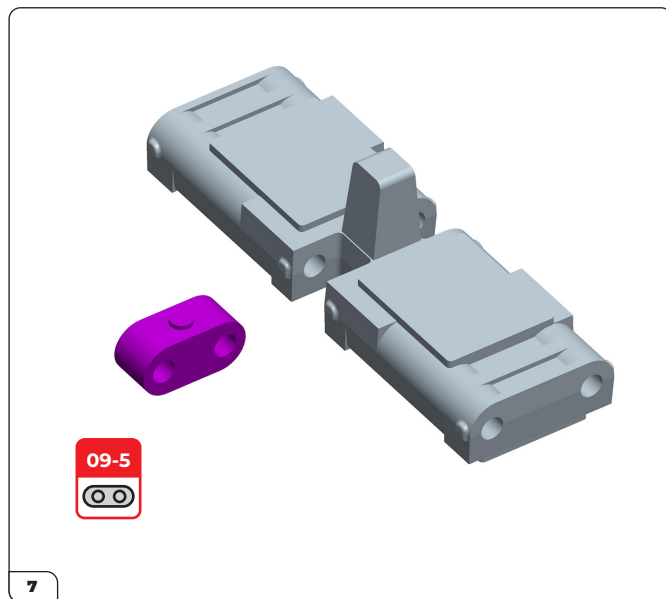

Pacchetto 11, fase 91, parte 91-1: un nuovo circuito stampato per migliorare il suono e il rinculo del cannone.

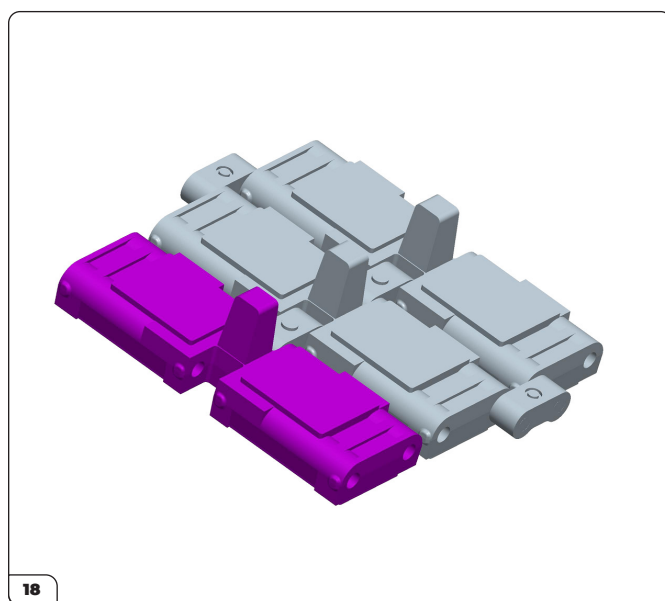

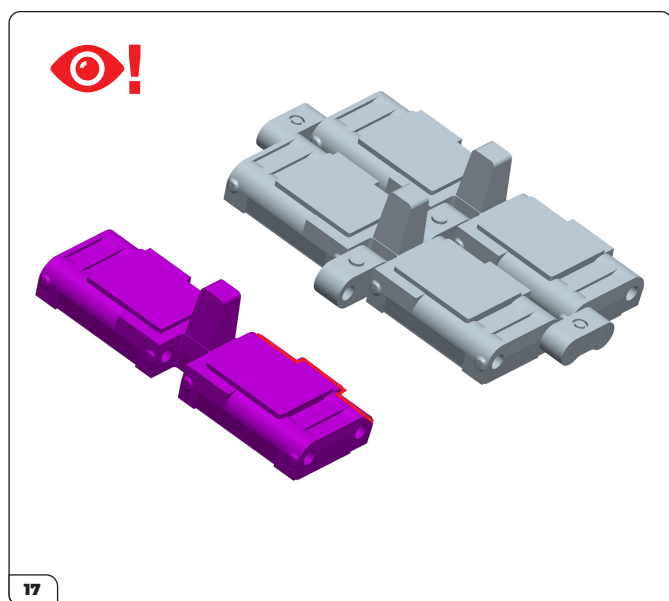

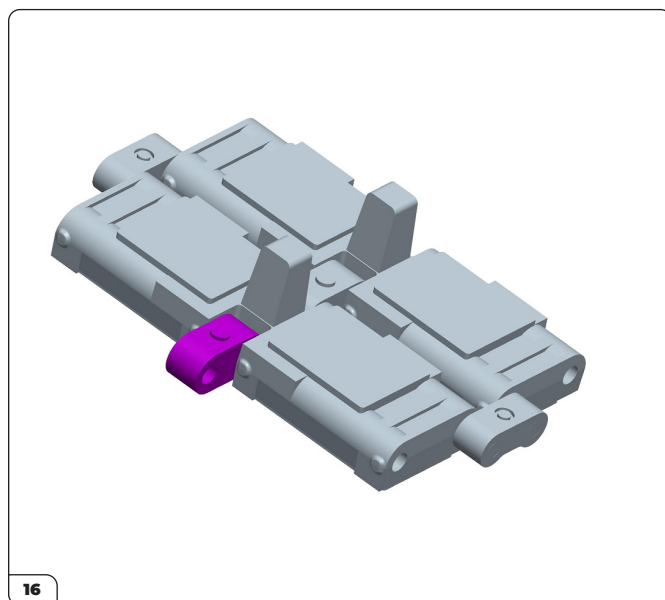

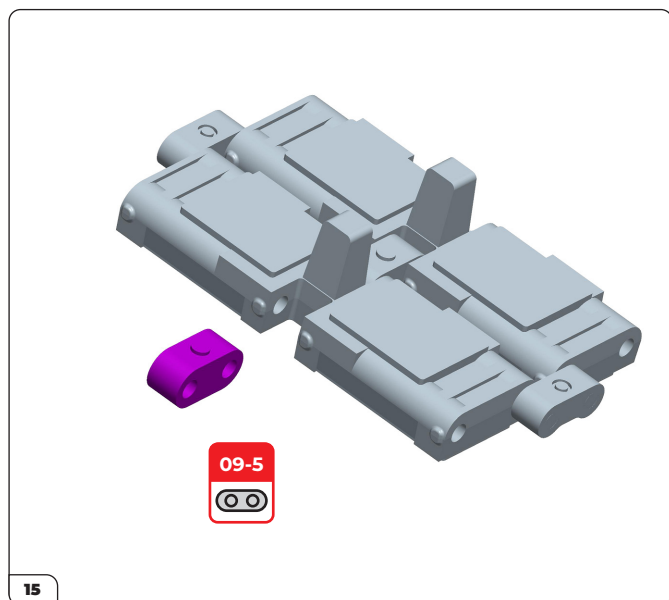

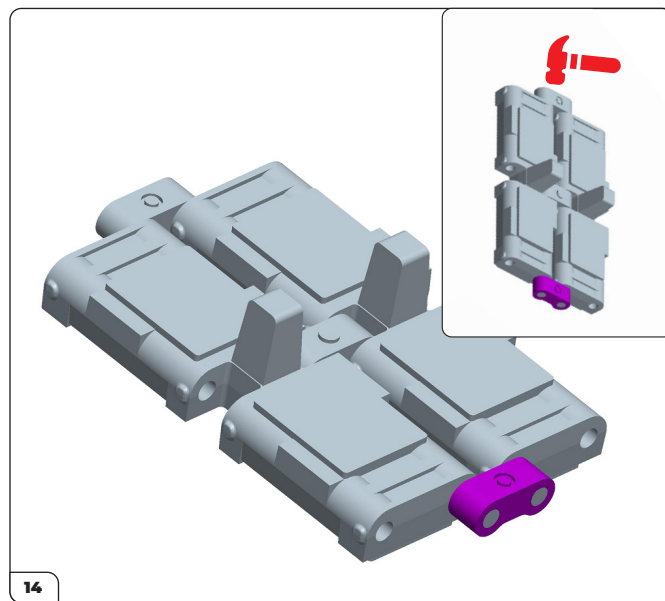

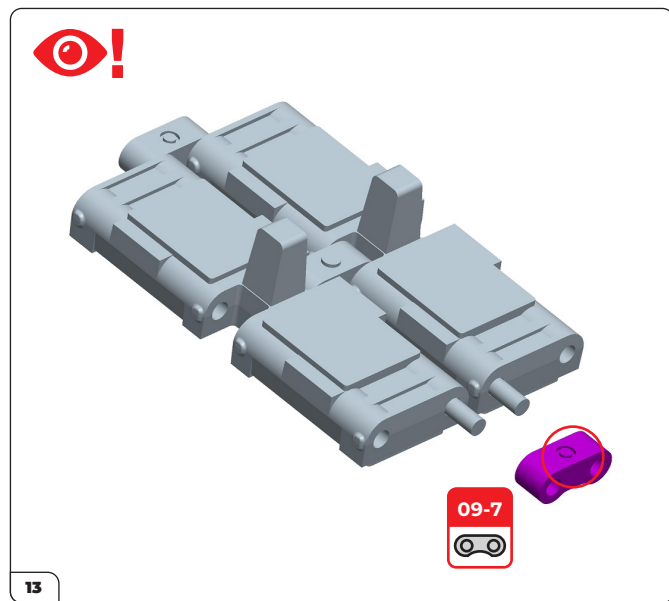

Ti auguriamo buon divertimento durante la costruzione del tuo carro armato Leopard. Per ricevere ulteriore assistenza e partecipare a discussioni interessanti, visita la pagina del forum dedicata a Leopard 2A6.
