Risoluzione dei problemi

MOVIMENTO DELLA TORRETTA:

Se la torretta non gira verso destra e verso sinistra, è possibile che l'ingranaggio di rotazione sia stato avvitato troppo. Allenta ogni vite di 1-1,5 giri.

MOVIMENTO DEL CANNONE:

Se il cannone non si muove verso l'alto e verso il basso, è possibile che vi siano delle sporgenze sugli angoli che devono essere smussate. Rimuovi il materiale in eccesso con una lima, della carta vetrata fine o un taglierino per permettere al cannone di muoversi liberamente.
